

## Buying FUNCs via OpenLedger (FUNC-BTS, FUNC-BTC, FUNC-ETH open orders)\*

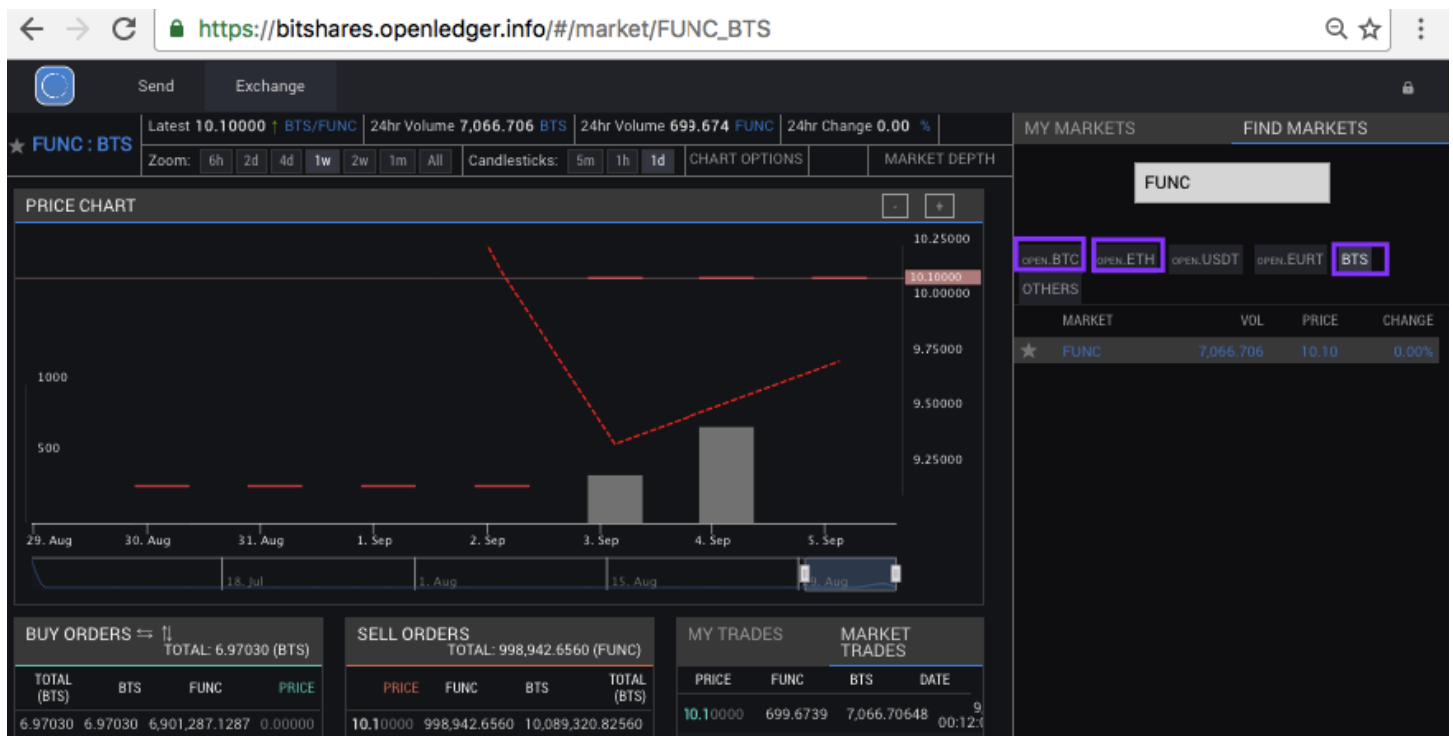

1. Enter your [OpenLedger account](#) or [create](#) it (if there is no any)
2. Click **Exchange** in the top menu (see below):

3. In the right top corner in [Find markets](#) field put the name of the coin you'd like to buy (FUNC in our case) and click Enter.

4. If all is done correctly, under the **Find market** field you'll see the FUNC market and the list of the currencies for which you can buy FUNC (now there are three open orders for **BTS, BTC and ETH**).

Let's imagine you are going to **buy FUNCs for your BTS**. Click on **BTS** tab in this case and then on the **SELL ORDERS** to see the current price, see the example:

The screenshot shows the 'SELL ORDERS' table with a purple arrow pointing to the first row, which contains the price 10.10000, 998,942.6560 FUNC, 10,089,320.82560 BTS, and 10,089,320.82560 TOTAL (BTS). The text 'click here' is written in purple below the arrow. The 'BUY FUNC' and 'SELL FUNC' order forms are visible at the bottom, showing the current price of 10.1 and the amount of 1 FUNC.

5. Once done, in the bottom of the page you'll see

**BUY/SELL ORDERS** with the actual minimal price to pay. Choose the FUNC amount you would like to buy\* and click the **Buy** button to proceed.
